

Concrete Batching Plant

Camelway Machinery

<https://www.camelway.com/>

Concrete Batch Plant for Sale

Camelway Machinery provides a wide range of [Concrete Batching Plants](#) along with all components include mixers, batchers, cement silos, etc, which are widely used for the projects such as buildings, bridges, roads, airport, ect. Our customized configuration equipments could produce different kinds of concrete, including ready-mixed concrete, roller compacted concrete(rcc), road concrete, overweight concrete, dry concrete, etc.

Mobile Plant

Economical concrete production solutions, applying in short-term projects.

Stationary Plant

suitable for large projects, producing high quality commercial concrete.

Concrete Batch Plant for Sale

Camelway Machinery provides a wide range of [Concrete Batching Plants](#) along with all components include mixers, batchers, cement silos, etc, which are widely used for the projects such as buildings, bridges, roads, airport, ect. Our customized configuration equipments could produce different kinds of concrete, including ready-mixed concrete, roller compacted concrete(rcc), road concrete, overweight concrete, dry concrete, etc.

Temporary Plant

compact modular design, applying in small and medium size projects.

Continuous Plant

produce roadbase materials

Stationary Concrete Batching Plant

The [Stationary Concrete Batching Plant](#) is a special concrete plant for large-output, high-efficiency, high-stability and high-precision concrete production.

Camelway Stationary Concrete Batching Plant adopts reliable and flexible components, making it easy to maintenance and owning a low failure rate. It is widely used in various projects such as roads and bridges, ports, tunnels, dams and buildings.

Mobile Concrete Batching Plant

The Mobile Concrete Batching Plant is a mobile concrete production equipment that can be built and put into production on job site. Meanwhile, it is the best choice for produce ready-mixed concrete in short-term projects.

Camelway Mobile Concrete Batching Plant adopts compact design; it can be transported by container, or hauling by trailer. Due to its small footprint and quick installation, the Mobile Concrete Plant can adapt to various harsh construction sites. In general, it is widely used in road projects, port construction, channel construction, etc.

Temporary Concrete Batching Plant

The Temporary Concrete Batching Plant usually produces concrete for specific projects. Compared with Permanent Batching Plant, the Temporary Concrete Plant adopts simple design and compact structure, reducing the initial investment cost and putting into production quickly.

Over the years, it has established cooperative relationships and provided thousands of equipment with many well-known engineering contractors at home and abroad, including Gezhouba Group(CGGC), China Communications Construction, Power Construction Corporation of China, ect.

Continuous Mixing Plant

The continuous mixing plant is equipped with a continuous mixer and a continuous batching machine. It discharges materials continuously in production. At the same time, it is commonly used to produce a variety of roadbed materials, such as lime soil, cement stabilized soil, cement stabilized macadam, roller compacted concrete, etc.

About US

Founded in 1983, Henan Camelway Machinery Manufacture Co., Ltd. is mainly engaged in R&D and manufacturing of high-tech equipment, such as construction equipment and crushing equipment, as well as providing technical solutions and supporting products. Over 30 years of innovation and development, Camelway has become a top leader in the concrete mixing equipment industry, and gradually developed a global company .

01

Camelway History

Camelway used know as Xingyang County Zhongyuan Construction Machinery Factory which is founded at 1983.

02

Camelway Honors

Camelway is committed to provide competitive products and excellent service for customers.

03

R&D Team

More than 30 R&D engineers

04

Our Customers

More than 3000 user choices worldwide
